Writing task 1

You should spend about 40 minutes on this task

Chart A below shows the rate of oil consumption (in millions of barrels) in a small country from 1950 to 2010. Chart B shows the number of people employed in the oil industry in that country, and also the rate of unemployment throughout the country over the same time. Write at least 150 words.

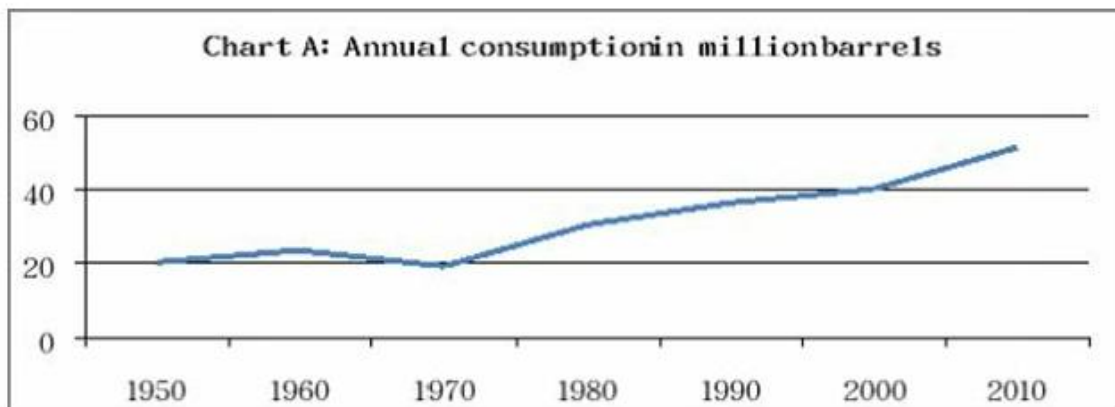

Chart B: Oil employment and national unemployment

	1950	1960	1970	1980	1990	2000	2010
000 people employed in oil industry	1	1.2	1	1.8	2.2	2.7	3.1
% unemployment rate nationally	4	4.1	3.9	3.1	2.8	2.2	1.6

Determine:

1. Is the table statistic data or movement data? What are the timescale?
2. What do the 2 axes show
3. Identify trends and exceptions
4. Select the main features using the table
5. Write a report summarising the information. Select and describe the main features, and make comparisons where relevant. Write at least 150 words.

Writing task 2

You should spend about 80 minutes on this task. This is an Ideas>Causes/effects type Task. It does not ask for your opinion, but it wants you to think of some possible ideas on the topic. You should introduce the topic, describe two or three causes, then two or three effects, and then summarise briefly. Write at least 250 words.

‘Pollution of rivers, lakes and seas is a major concern for people who seek to protect the environment. What are the possible causes of water pollution, and what effects does this have on animal life and human society?’

Selamat mengerjakan.
